

The image is a composite of two interior design photos, separated by a diagonal orange line. The top-left photo shows a dining area with a white tablecloth, a world map on the wall, and a small table with a lamp. The bottom-right photo shows a living area with a blue sofa, a large window, and a cowhide rug. The text 'THE MEDIAN' is overlaid on the top-left photo.

# THE MEDIAN

# THE MEDIAN

**15 MINUTES TO  
WHERE YOU  
WANT TO BE?  
IT'S POSSIBLE.**

**The Median**, the first high-rise project of Citrineland Corporation, offers a seamless work integrated lifestyle to its future residents. With stylish details and practical modern amenities that suits an on-the-go lifestyle, this is the next address you need to covet.

**The Median** is just around the block from Cebu's premier business and commercial district, Cebu I.T. Park. Soon, a vibrant community awaits you.

- awning windows with aluminum frame
- Large glass awning windows with aluminum frame
- Complete electrical switches and convenient outlet in living, dining, kitchen & T&B areas
- Provision for airconditioning unit with outlet
- Provision for utilities
- Balcony area (for corner units)

SMART HOME. SMART LIFE.

# Home Automation

Every unit in The Median includes a smart-home automation feature that provides integrated remote access to everything from security cameras, lighting control and others.

Any device in your home that uses electricity can be put on your home network at your command. Whether you give that command by voice, remote control, tablet or smartphone, the home reacts. It allows you to live the life you fairly deserve at a reasonable price.

---

## Basic Home Automation Deliverables

Gateway

Door Lock

Sensor

Light bulb

IP Camera

## Door Lock

## Door lock system

An unlocked door or attempted burglary? These two features are swift. It immediately alerts you through the mobile app. This gives you more than enough time to contact property management to further check your unit while you're away for the moment.

They're both battery operated that lasts longer than you think.

## Door Sensor

## Home Gateway

Home Gateway serves as the main controller or the “brain” that connects and sends the commands you make from the mobile application on your phone or tablet to the automated items.

It is AC powered and takes less electrical consumption.

Home Gateway

## Home Mate App & Light controls

Automated lights are integrated through the wired system as the unit is being built. Saving you the hassle of installing any device manually.

Whichever part of the room you're at, you can conveniently control the brightness through your Home Mate app on your mobile phone or tablet.

Home Mate 2

## IP Camera

The IP Camera is a beneficial feature you get. Having the privilege to secure and monitor your home any time of the day while you're out and about with life is an edge you'll be envied for.

It is also USB powered and takes less electrical consumption.

THE  
MEDIAN

IP Camera

# Basic Home Automation Placement Diagram

Legend:

- |   |            |                 |
|---|------------|-----------------|
| 1 | Gateway    | AC powered      |
| 2 | Door lock  | Battery powered |
| 3 | Sensor     | Battery powered |
| 4 | Light bulb | Wired           |
| 5 | IP Camera  | USB powered     |

**Note:** This diagram is for presentation purposes only. **Actual products may vary** due to product enhancement.

## AMENITIES

- Foyer- Cafe-like lobby
- Courtyard- Outdoor lounge
- Sitting Room- Multi-use room
- Study- Mini-library
- Plunge- Outdoor pool
- Patch 15 and Patch 26- Garden Roof decks
- Provision for gym, laundry shop, convenience store, and water station at the ground floor
- WiFi at the lobby and amenities area

## BUILDING FEATURES

- 1-level podium parking
- 3-level basement parking
- 24-hour security
- Twin hi-speed elevator system and 1 service elevator
- Fire protection & automatic sprinkler system
- 100% back-up generator
- Individual mailboxes
- Emergency lights at the hallways

## Green Building Features

### Wide-framed Windows

Common areas have wide-framed windows installed to allow a lot of daylight to come through. This saves up on the use of electricity during the day and brightens up areas that have lesser access to daylight.

---

### Natural Ventilation in Common Areas

The building is smartly designed to allow natural ventilation in every common area, corridor, and hallways. It helps balance the temperature within the building, making it cooler especially on hot and humid days. Residents enjoy more of nature's elements at zero cost.

## Green Building Features

### Awning Windows

Aside from its aesthetic and modern look, this window is ideal for high levels as it is designed to be weather-tight. The windows were redesigned according to the green building code. Instead of one, both windows are maximized to full function that allows more airflow to come in the unit.

---

### Rainwater Catchment System

A catchment system is integrated all throughout the building that collects rainwater that is stored into a collection tank. The collected rainwater is reused for irrigation purposes.

## Green Building Features

### Garden Patches

Common areas such as the courtyard, pool area, Patch 15 & 26 have mini landscapes to set a refreshing atmosphere, making the environment easier for the unit owners to commune and relax with nature.

---

### Material Recovery Facility

Garbage is disposed in this facility according to its proper segregation. This promotes the importance and responsibility of proper waste disposal within the community.
